

HOW TO DEVELOP CHILD CREATIVITY

WE CAN ALL BE CREATIVE IN OUR OWN WAY

WAYS TO RAISE CREATIVE KIDS

CREATIVITY IS A KEY COMPONENT OF HAPPINESS

Allow for your child to make simple choices.

What if people could fly?

Ask your child open-ended questions.

Give your child permission to be different.

Give children the opportunity to express "divergent thought".

Encourage independence.

Engage in story telling. Start a story and take turns building upon it.

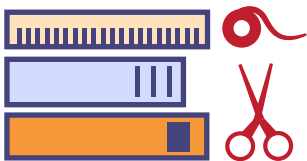

Help kids pursue their passions.

Spend enough time with your children.

Provide items in your child's environment to stimulate their imagination. Drawing supplies, blocks, books, and random craft supplies can all contribute to elaborate dramatic play scenes.

Brainstorm different uses for items with your child.

Designate a space for creating. Space is also a resource your kids need.

Aspire to be an architect.

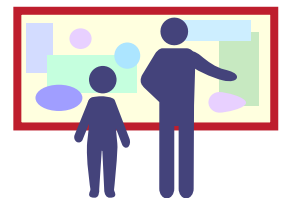

Play with your child.

Be prepared for "messy play".

Discuss creativity.

Play make-believe games.

Invent a Superhero Identity

Take the time for your own creativity. Since kids learn from watching their parents.

Celebrate moments every day.

Always let your children be involved in what you are doing.

Focus on play and process, not productivity.

In projects, avoid telling kids exactly what to do.

Encourage curiosity and seeking answers.

- ✗ STOP CARING WHAT YOUR KIDS ACHIEVE
- ✗ DON'T BE SO BOSSY
- ✗ DON'T CRITICISE AND COMPARE

REDUCE SCREEN TIME

Kids who regularly use the TV or computer are more likely to feel bored than other kids.

AVOID SHAMING OR EMBARRASSING CHILDREN WHO EXPERIMENT THROUGH TRIAL AND ERROR.
